SECTION G

SPECIFICATION AND EVALUATION

1. PURPOSE

The Department is seeking bids from Registered Professional Structural Engineer who has the relevant qualifications, registration with ECSA, and expertise for the Project: Department of Health: Addington Hospital: Installation of a Backup Chiller.

2. BACKGROUND

- 2.1 Addington Hospital's core block (or main tower) is provided air-conditioning via a water-cooled chilled water system. This system comprises of three sub-systems;
- Four (4) chilled water generators (Chillers 1-4), located at the basement of the core block building
 - Six (6) cooling towers, four (4) units located at the roof of the 16th floor of core block and two (2) units at the roof of the Nurses Building
 - Multiple air-handling units (AHUs) distributed within the core block building
 - Basement plant room-two (2) masonry AHUs serving theatres complex and other areas
 - 2nd floor serving matrons 13th floor serving wards
 - 15th floor serving admin offices
- 2.2 Whilst the core block was undergoing façade renovations, around 2012 to 2015, a variation order was approved for the replacement of chilled water generators (Chillers 3 and 4), with two smaller capacity chillers (RC to Trane manufactured screw chillers). The motivation was to replace two chillers which had not worked since commissioning about 10 years prior, as the core block was functioning on one chiller whilst the other was beyond economical repair (chiller 2). During the construction works, modifications were done to the condenser pipe work in order to allow the chillers to function with the 2nd floor cooling towers. The modifications left Chiller 1 and 2 not operational and Chillers 3 and 4 in working state.
- 2.3 A project was then initiated to replace Chiller 2 as this was beyond economical repair. During the project activities of replacing chiller 2, it was noted that the other buildings, and parts of the core block, within Addington Hospital were not being given attention in terms of HVAC. These buildings are supplied air-conditioned air by systems separate from the main core block system. A project called "HVAC System Maintenance" was initiated to address the air-conditioning in these buildings.
- 2.4 The replacement of chiller 2 proposed to relocate the cooling towers from the 16th floor to the 2nd floor nurses building. This required information from a structural engineer on the suitability of the 2nd floor roof in taking the additional load of the cooling towers, thus the project had a dependability on another service which was not covered in the consultant's appointment. The project was then put on hold pending this investigation.
- 2.5 This investigation led to the creation of the project "Investigation of Services" because a need to answer questions related to the services (water supply, electrical supply, air-conditioning, hot water systems etc.) at the hospital had arisen.
- 2.6 This resulted in scope duplication between these multiple projects. This resulted in the HVAC System Maintenance project being put on hold and the Investigation of Services taking the lead. For the replacement of the chiller #2, it was agreed that the project would continue with the view of providing back-up to the smaller chillers as air-conditioning was critical to the core block, especially the theatres. The confirmation brief was then done with the detailed scope mentioned in the brief. The appointed consultant was Dihlase Consulting Engineers. The same consultant was appointed on the Investigation of Services for mechanical services.

- 2.7 HIAC approval was granted to proceed to Design Development on 07 January 2020. This concept report contained design recommendations, which were;
- Separation of the condenser pipework mentioned before between the two levels of condenser cooling towers
 - Installation of Building Management System
 - New MCCP panel
- 2.8 The Concept & Viability Report had a project cost estimate of R 14 706 141.19. The recommendations had a cost estimate of R3 645 500 inclusive of VAT. In the submission of the FIDPM Stage 3 report, the consultants requested clarity on the approval of their recommendations as they feared not being compensated for the work done. The HIAC clarification letter was drafted and forwarded to the consultants via DoPW and stated the following: "It was requested that the detail design report needs to be done as a brand new report for FIDPM Stage 3: Design Development addressing the detail design and not include Stage 2 contents again, and that the report must feature the associated recommendations by the Professional Team to deliver a working design and will be reviewed at that stage"
- 2.9 After the HIAC clarification letter, the consultants went back and came back with revised recommendations different to the ones presented. The summary of recommendations is contained in Annexure and now total an estimate of R60 605 000.00 inclusive of VAT.
- 2.10 It is not clear how the original HVAC system was supposed to run in their original design configuration. This is now made complicated by the modifications that have been done to the system during the external façade works and by the maintenance personnel or others in the lifetime of the HVAC system.
- 2.11 This project now aims to resolve the above concern through an upgrade of the HVAC system for the hospital in the Main Tower Block. This means that the Concept stage of the project must be redone in order to determine the best possible solution to the HVAC system at Addington Hospital's Core Block building.
- 2.12 The Mechanical Engineering consultant, Dihlase Consulting Engineers, has already been appointed to this project and has been appointed as the Principal Agent.

3. SCOPE OF WORK

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
- a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

I, the undersigned, in submitting the accompanying bid:
